Year 10

#### Year 10 & 11

- Each unit of work follows the learning principles for the subject so that by the end of Year 10, students have a deep knowledge of our subject.
- Their deep knowledge means that they know lots of things (declarative knowledge), and they are able to do lots of things with this information (procedural knowledge).

#### Year 12 & 13

- By the time we introduce A Level content, we are adding to existing frameworks of knowledge (schema).
- By re-framing KS4 as the intellectual powerhouse of our subject, we can easily teach A Level content by leaning on what students already know.

#### Cycle Assessment points

- Mid-cycle Assessment.
- End of cycle Assessment Week 10 followed by DIRT lesson
